

Lab-1

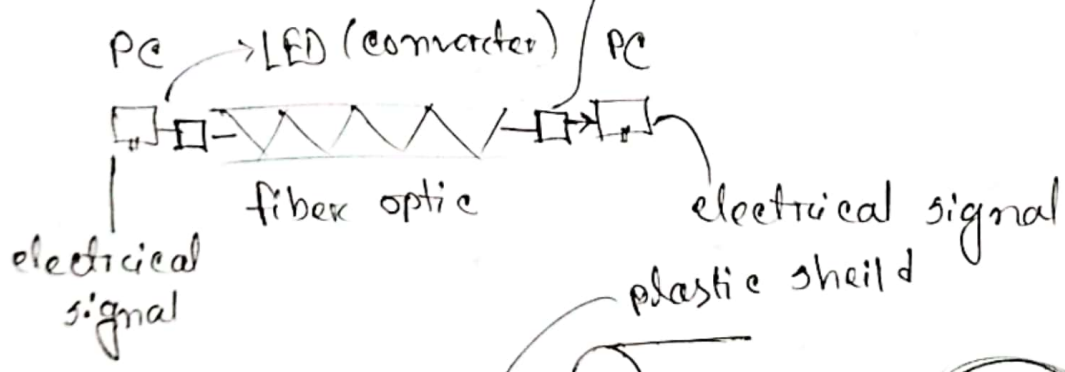

- Computing Devices (PC)
- (NIC network interface card)
- Transmission medium
  - a) Unguided (wireless) X
  - b) Guided
    - Fiber optic
    - Coaxial (Dish TV signal)
    - Twisted pair cable

multiple PC connection as a switch use RJ45 24,

- a) CAT5 (155M)
  - b) CAT6 (professional)
  - c) 4 pairs cable
- 

# Twisted

- 4 solid colors [ Green, blue, orange, brown ]
- 4 Mixed with white [ white - Brown  
white - Green  
white - Blue  
white - Orange ]

Next lab

CAT5 - 2m

RJ45 - 5/6 pcs

Crimping tool

straight through cable

1	white	orange
2	orange	white
3	white	green
4	green	white
5	white	blue
6	blue	white
7	white	brown
8	brown	white

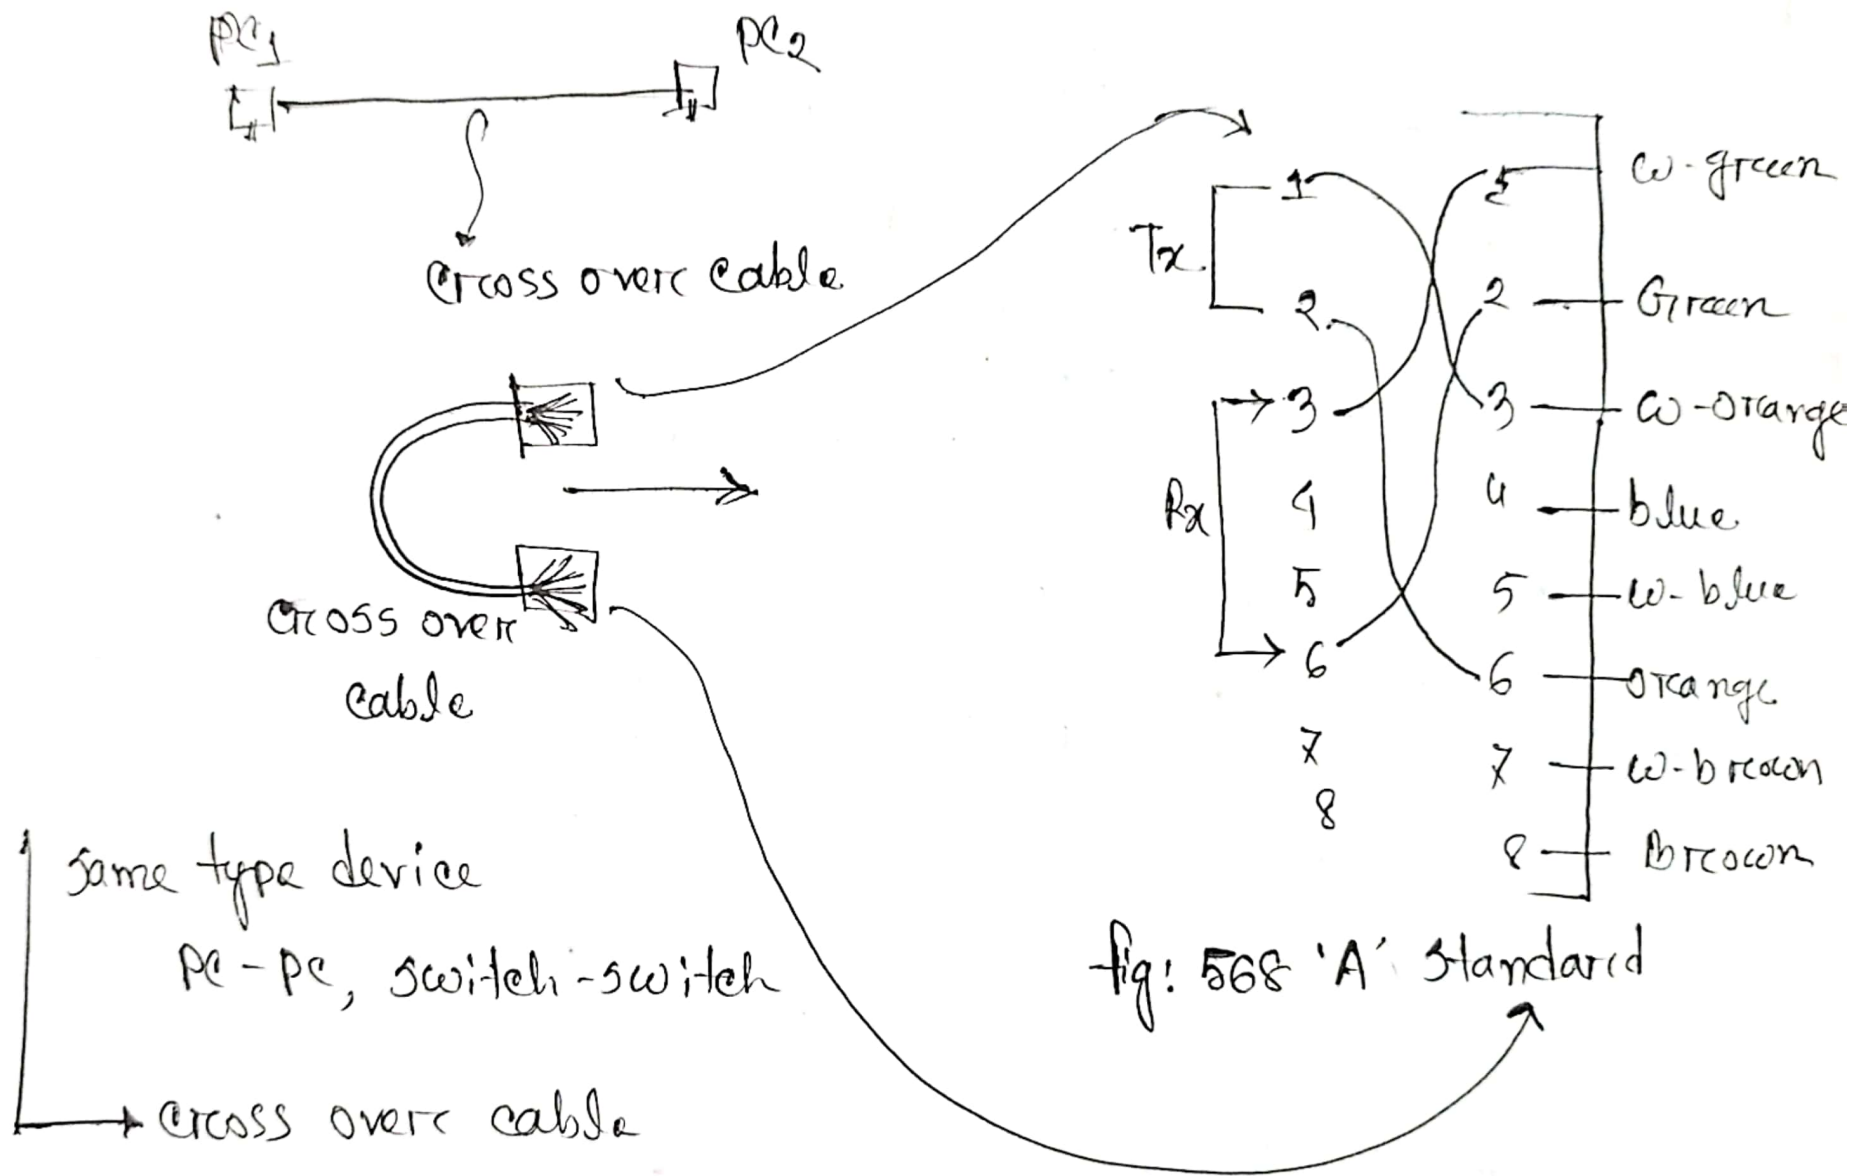

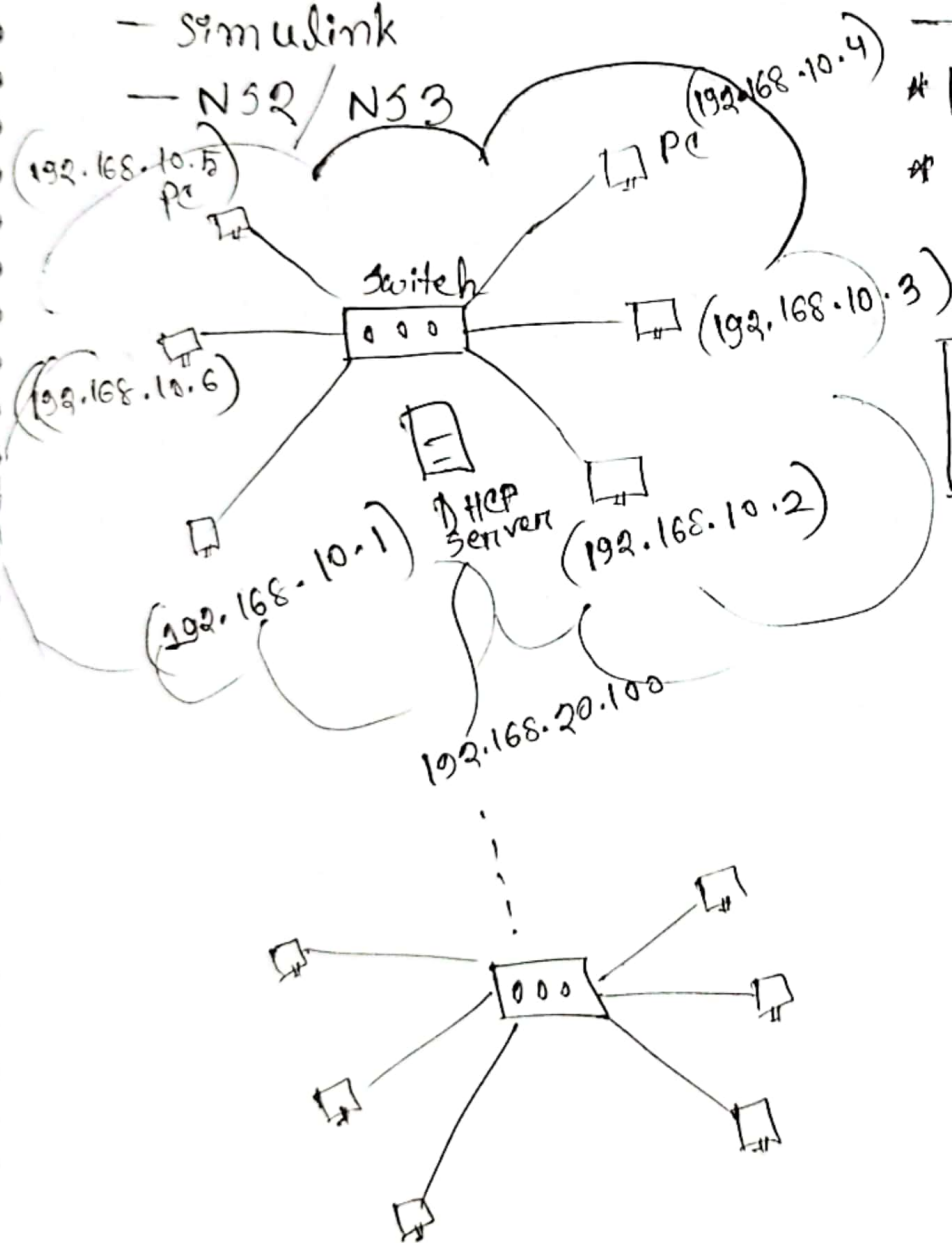

fig: 568'B' standard

lab-03

## Simulation

- ✓ CISCO packet Tracer (pre-defined GIG)
- OPNET
- OMNET
- simulink
- NS2 / NS3

## Logical design

\* PC - end device = 6

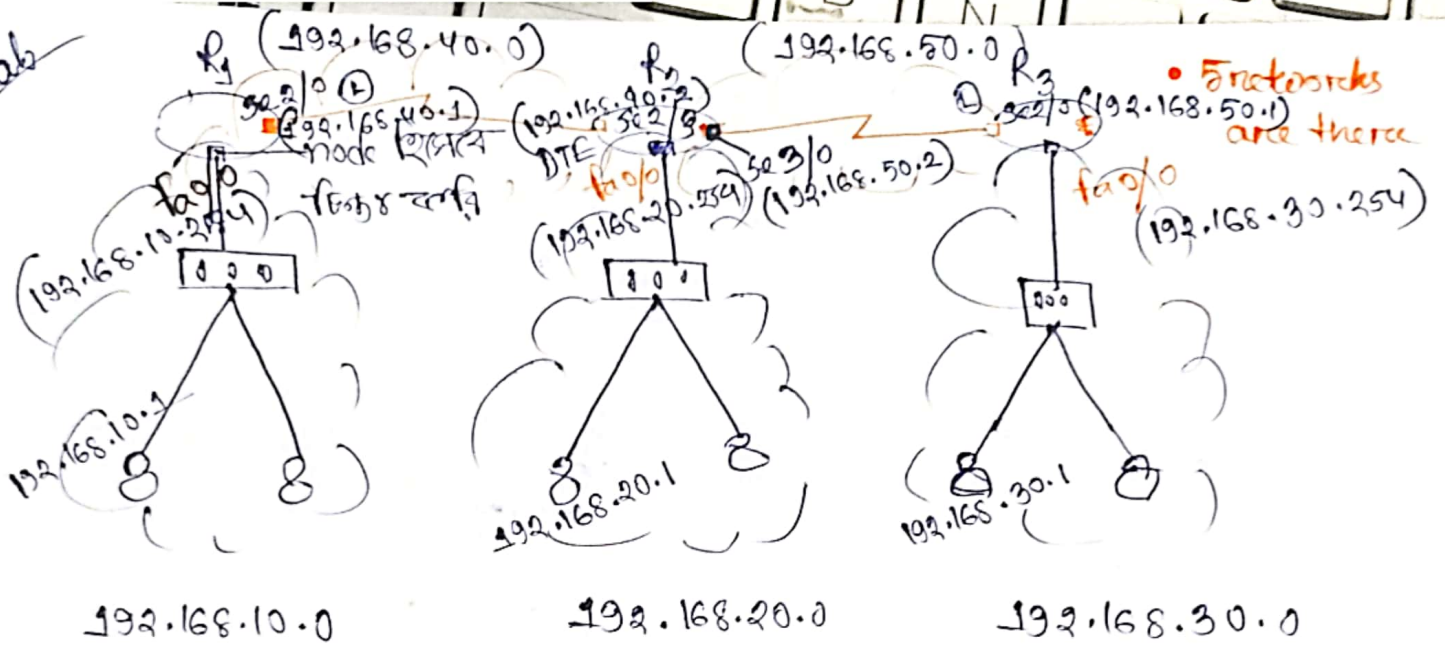

\* 2960 switch

TTL: Time to live  
(ms) - ~~time to live~~ device  
उत्तर मास (Hop count)

Lab

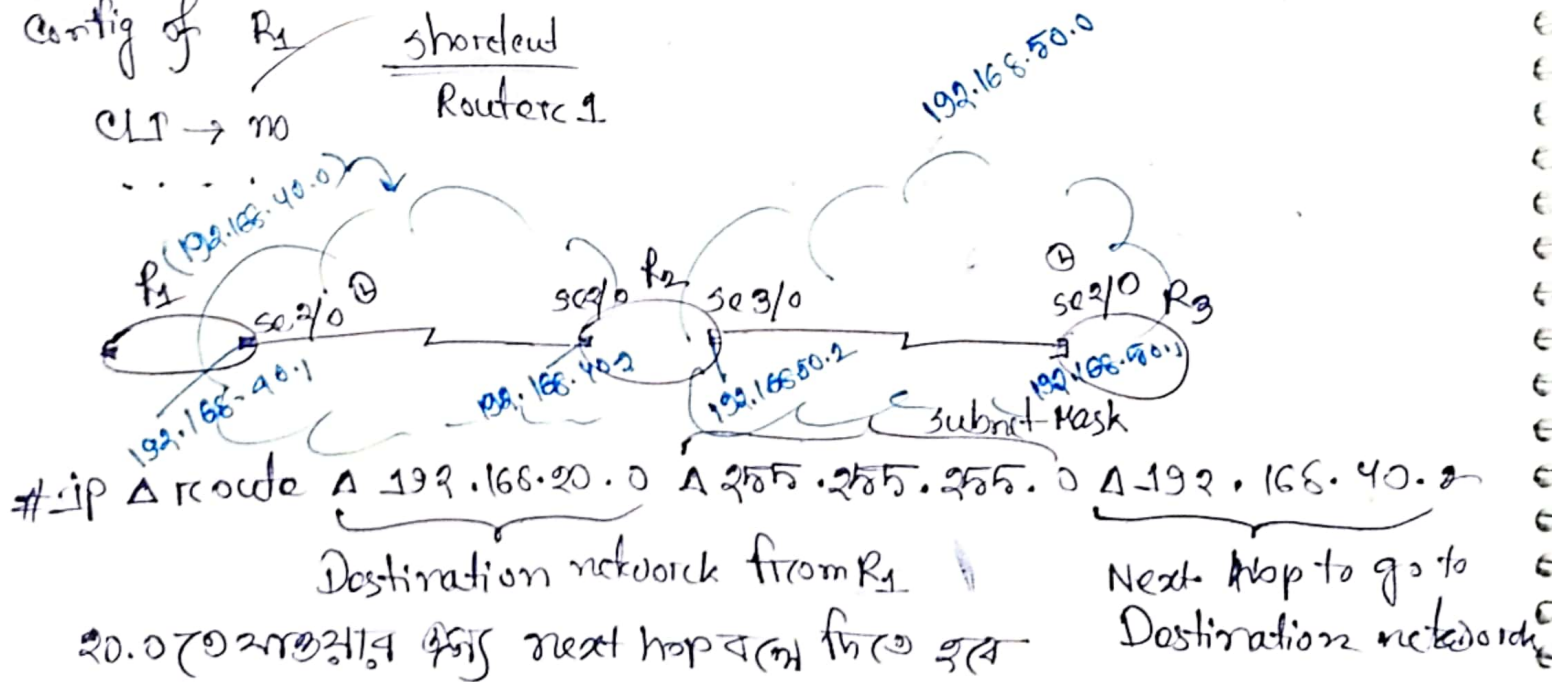

Routers to Routers — serial connection (much faster)  
- different ports

switch and server routers — Ethernet

① DCE : Data communication Equipment  
DTE : Data Terminal Equipment

Config of R1 shreded  
Router 1

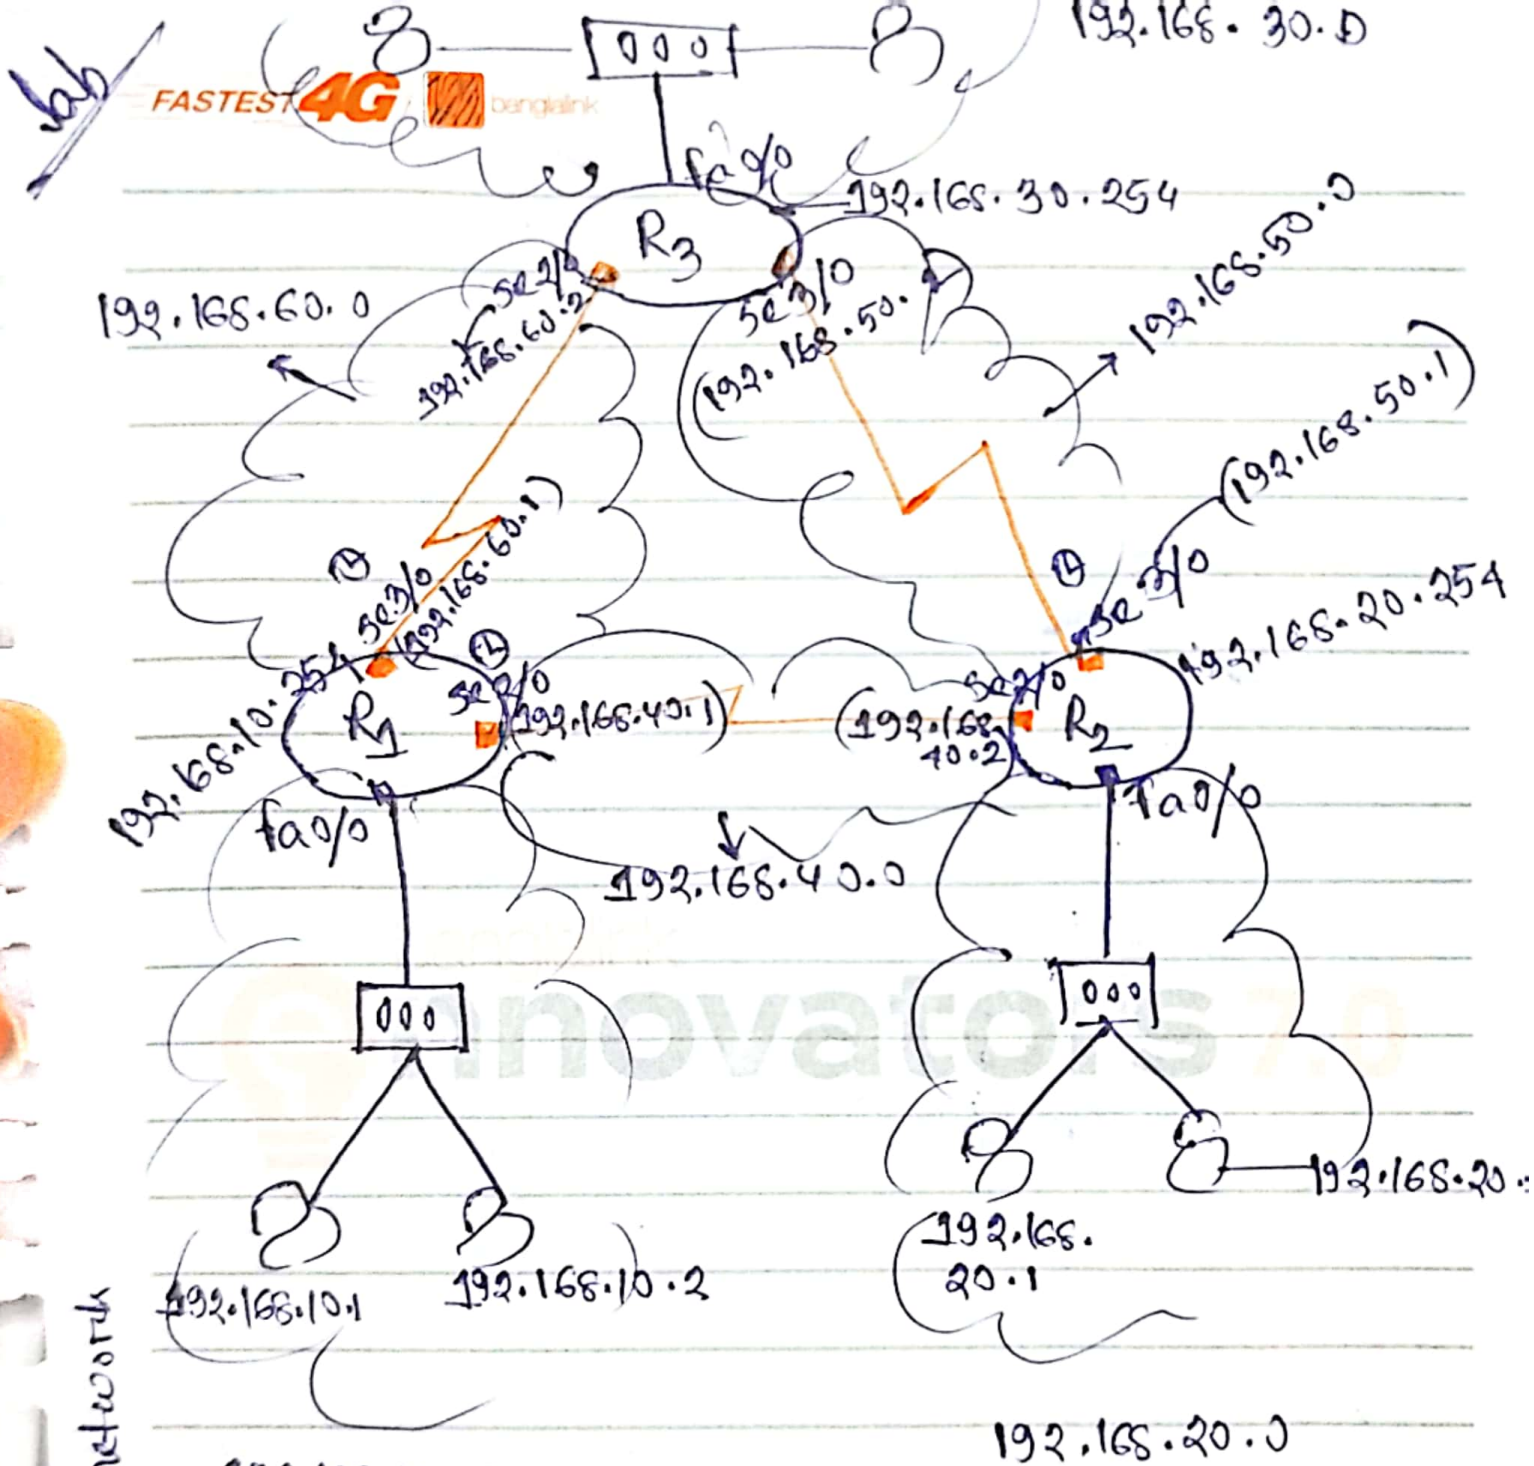

CLI → no

Destination network from R1
